

### Shady Hollow

Following the development of Shady Lane, some were quick to see the potential of this cliff a little further to the south. The routes face west so provide a shady spot during the hot summer months.

Approach as for Shady Lane; through the yellow gate by the last hairpin into the parking lot. Follow the track immediately to the right. After a few minutes, the road descends gently for about 80m to a flat part (5 minutes from the gate). Take a faint trail on the south (left) side of the track into the obvious valley, passing through trees and boulders between rock walls on either side. Shady Lane is on the right (west) side. Follow the trail along the bottom of the draw for few minutes further. About 10 minutes from the car.

**1. Shady Hollow** 5.10a

7 bolts. Back clean the 5th bolts to avoid drag. Chain station.

*FA. Rolf Rybak, Oct 2013*

**2. Something by John** 5.11c

7 bolts. Still needs extensive cleaning and not for the faint at heart.

*FA. John Fantini, Jun 2013*

**3. Passport to a New Decade** 5.10c

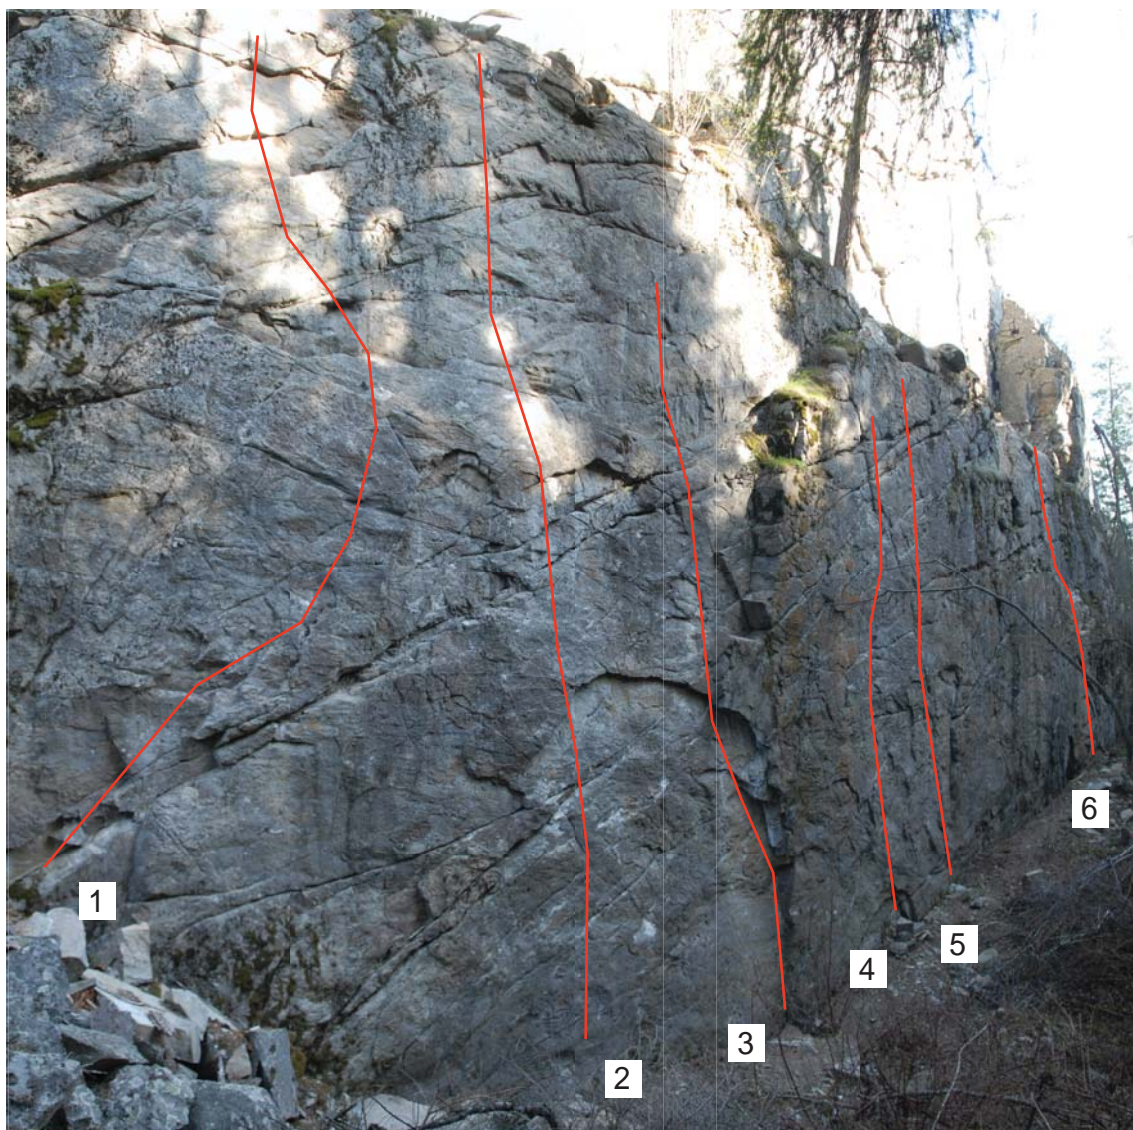

7 bolts. The obvious flake/corner

*FA. Cayle Stewart, April 2013*

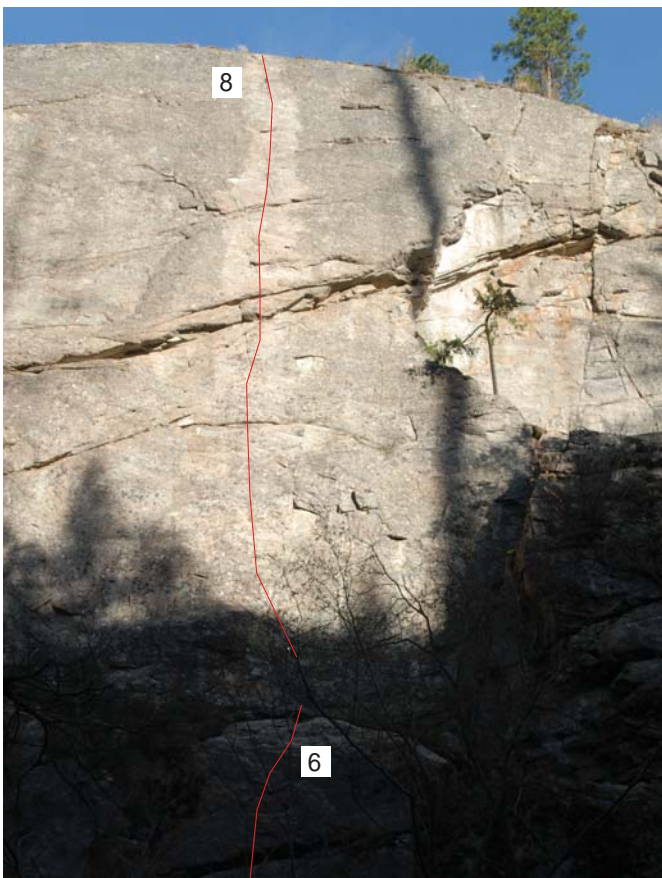

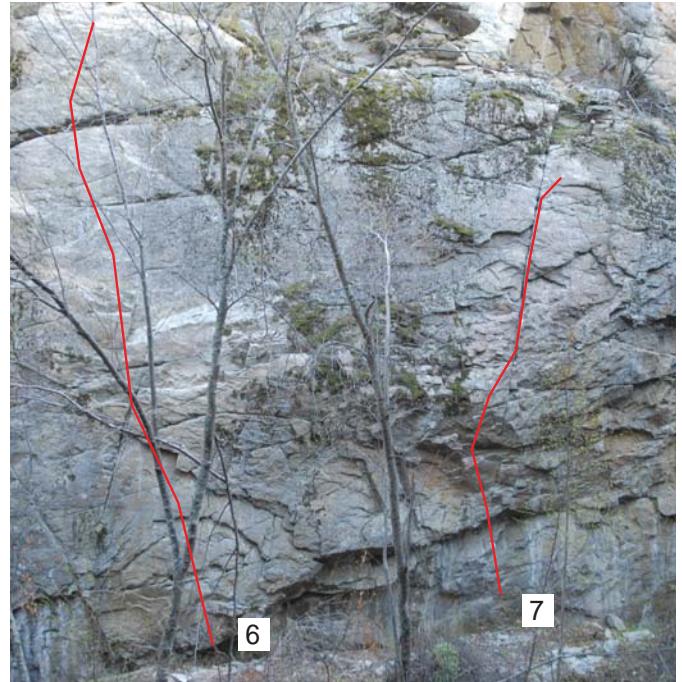

**4. Shady Business** 5.11b

6 bolts. Fun moving up the face to the crack at the end.

*FA. Rolf Rybak, April 2013*

**5. No Visa Required** 5.11d

6 bolts. Start up the diagonal crack for a few bolts before heading directly up the face toward the chains. .

*FA. Rolf Rybak, June 2013*

**6. Easy Feat** 5.10a

8 bolts. It is all in the start - really the access to Ace in Hole.

*FA. Rolf Rybak, July 2013*

**7. Overbite** 5.11a

6 bolts. Steep jug hauling to some interest gaining the cracked slab above

*FA. Rolf Rybak, June 2013*

**8. Ace in the Hole** 5.11a

12 bolts. Sustained climbing face climbing. Recommended. Approach via Easy Feat.

*FA. Rolf Rybak, Sep 2013*
